WALLACE'S GARDEN CENTER

Maid Of Honor Hellebore

Helleborus 'Maid Of Honor'

Plant Height: 18 inches

Flower Height: 24 inches

Spread: 24 inches

Spacing: 18 inches

Sunlight: ◐ ●

Hardiness Zone: 4

Other Names: Lenten Rose, Winter Rose

Group/Class: Wedding Party Series

Description:

Large double blooms are rose pink with deep pink blush, speckling and purple overtones; one of the first flowers to come up in cool weather and what a beautiful harbinger they are; great in woodland gardens and on shaded slopes

Ornamental Features

Maid Of Honor Hellebore features showy nodding double rose cup-shaped flowers with lavender overtones and hot pink spots at the ends of the stems from early to late spring. Its glossy oval compound leaves remain bluish-green in color throughout the year.

Landscape Attributes

Maid Of Honor Hellebore is an herbaceous evergreen perennial with an upright spreading habit of growth. Its medium texture blends into the garden, but can always be balanced by a couple of finer or coarser plants for an effective composition.

This is a relatively low maintenance plant, and should be cut back in late fall in preparation for winter. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Maid Of Honor Hellebore is recommended for the following landscape applications;

- Mass Planting
- Rock/Alpine Gardens
- Border Edging
- General Garden Use
- Naturalizing And Woodland Gardens

Planting & Growing

Maid Of Honor Hellebore will grow to be about 18 inches tall at maturity extending to 24 inches tall with the flowers, with a spread of 24 inches. When grown in masses or used as a bedding plant, individual plants should be spaced approximately 18 inches apart. Its foliage tends to remain dense right to the ground, not requiring facer plants in front. It grows at a medium rate, and under ideal conditions can be expected to live for approximately 5 years. As an evegreen perennial, this plant will typically keep its form and foliage year-round.

This plant does best in partial shade to shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. This particular variety is an interspecific hybrid, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets. It can be propagated by division; however, as a cultivated variety, be aware that it may be subject to certain restrictions or prohibitions on propagation.
