

Gold Dust Variegated Croton

Codiaeum variegatum 'Gold Dust'

Height: 5 feet

Spread: 5 feet

Sunlight: ☉ ●

Hardiness Zone: (annual)

Other Names: Garden Croton, Variegated Laurel, Joseph's Coat

Description:

This woody perennial is largely considered as a houseplant in colder climates, and noted for its striking foliage but does well outdoors in warm areas; glossy, leathery, ovate or lanceolate leaves of green, covered with fine yellow specks

Ornamental Features

Gold Dust Variegated Croton features dainty racemes of white star-shaped flowers from late winter to early spring. Its attractive glossy pointy leaves remain dark green in color with distinctive yellow spots throughout the year.

Landscape Attributes

Gold Dust Variegated Croton is a dense herbaceous annual with an upright spreading habit of growth. Its wonderfully bold, coarse texture can be very effective in a balanced garden composition.

This is a relatively low maintenance plant, and should not require much pruning, except when necessary, such as to remove dieback. Deer don't particularly care for this plant and will usually leave it alone in favor of tastier treats. It has no significant negative characteristics.

Gold Dust Variegated Croton is recommended for the following landscape applications;

- Accent
- Mass Planting
- Container Planting

Planting & Growing

Gold Dust Variegated Croton will grow to be about 5 feet tall at maturity, with a spread of 5 feet. Although it's not a true annual, this plant can be expected to behave as an annual in our climate if left outdoors over the winter, usually needing replacement the following year. As such, gardeners should take into consideration that it will perform differently than it would in its native habitat.

This plant does best in full sun to partial shade. It does best in average to evenly moist conditions, but will not tolerate standing water. It is not particular as to soil pH, but grows best in rich soils. It is somewhat tolerant of urban pollution. This is a selected variety of a species not originally from North America, and parts of it are known to be toxic to humans and animals, so care should be exercised in planting it around children and pets.

Gold Dust Variegated Croton is a fine choice for the garden, but it is also a good selection for planting in outdoor pots and containers. With its upright habit of growth, it is best suited for use as a 'thriller' in the 'spiller-thriller-filler' container combination; plant it near the center of the pot, surrounded by smaller plants and those that spill over the edges. It is even sizeable enough that it can be grown alone in a suitable container. Note that when growing plants in outdoor containers and baskets, they may require more frequent waterings than they would in the yard or garden.
